

Rimal Spa opens at Mövenpick Hotel Bahrain.

Manama, Bahrain, 26 November 2014: Mövenpick Hotel Bahrain announced the award-winning hotel's newest facility, with the opening of Rimal Spa. The European-style spa with its modern design provides result-driven treatments to both corporate and leisure travellers staying at the hotel, as well as Bahrain residents and International visitors.

Manama, Bahrain, 26 November 2014: Mövenpick Hotel Bahrain announced the award-winning hotel's newest facility, with the opening of Rimal Spa. The European-style spa with its modern design provides result-driven treatments to both corporate and leisure travellers staying at the hotel, as well as Bahrain residents and International visitors.

Rimal Spa features 12 treatment rooms, including single treatment suites, one double female suite and two traditional Turkish hammam suites with their own steam rooms and heated wet tables. All treatment rooms are designed to the highest standards and have private showers. The wellness facility offers segregated male and female wings with relaxation waiting areas where organic herbal infusions are served.

Commenting on the latest addition to the five-star property, General Manager Daniel Kaan said the spa with its unparalleled offering creates a new benchmark for luxury spas in Bahrain "The exemplary service and European quality standards are bound to impress hotel guests and residents alike."

To enhance the wellness journey, Rimal Spa offers exclusively designed, holistic and non-invasive treatments using London's Harley Street Skin Care products and CACI non-surgical face and body lift machines. Voya marine products and signature treatments using seashells add a unique dimension to the spa, which also does its part to support green practices and halal-certified organic products.

"We are extremely excited about the opening of our brand new spa," added Daniel Kaan, "It is a great complement to our existing amenities and our regular guests are delighted with the additional options they now have to unwind and relax. It will also be beneficial in attracting business from the wellness travel segment."
