

**MÖVENPICK**
HOTEL LAUSANNE

Sustainability
environment protection

Our intentions and goals

The Mövenpick Hotel Lausanne actively contributes to preserve the planet and to minimize impacts on the environment. An energy saving consultant has been hired since years producing excellent energy savings and a detailed weekly calculation of our electricity, water and gas consumptions.

Since the opening of the hotel in 1988, all guest rooms and public areas are using water from the lake to cool the building down and to produce cold for compressor units. From 2002, water taps have been progressively fitted with water saving devices in all rooms, kitchen, toilets and fitness area resulting in a tremendous amount of saved water. Since 2008, incandescent bulbs have been phased out and replaced by energy saving light bulbs.

Starting from 2011 our hotel has been certified with the Green Globe certification label, followed by TripAdvisor GreenLeaders Program in 2014 and by the Swiss Hotel Association Green Living and Sustainable living label in 2015.

72 Premium rooms and 3 additional meeting rooms

In 2012, the hotel has added a new wing with 72 Premium rooms and three additional meeting rooms. This new building comply with the Swiss "Minergy" standard comprising of solar panels, reversible heat-pump, new boiler installations and centralized ventilation.

Our heart and priority

Our customers

All our 337 guest rooms are provided with energy saving key card devices. Environmental-friendly shampoo and soap dispensers are displayed. Eco-friendly amenities are also available. In room, sheets and towels are replaced on request. Room cleaning is done with eco-labeled products. Complimentary Lausanne public transportation card valid during their stay is given to all our hotel guests.

Our suppliers

The choice of suppliers is of great importance and have to meet our environmental standards. Our Chef buys mostly local and seasonal goods.

Our waste management

Dry and wet garbage are being sorted out and recycled (glass, paper and metal) and kitchen oils are treated and converted into bio fuel.

Our employees

Our employees regularly attend workshops and are able to make suggestions and ideas for improvement. They are made aware of their responsibilities for the environment and are invited to start contribution at home too.

Our projects

Some major renovation works will take place soon including the 265 rooms of the main building, the conference rooms, the restaurants, the bar and the lobby. This renovation program started with the replacement of all the windows by triple glazed ones allowing energy saving expenses and less CO₂ emissions; all lifts have been modernized reducing energy costs, then with the roof top sanitation/waterproofing.

All our European hotels are
Green Globe certified:
