Luxury and environment in harmony.

The Green Key Eco-Rating Program is a graduated rating system designed to recognise hotels, motels and resorts that are committed to improving their environmental performance.

- Using the drip irrigation method and irrigating before sunrise or after sunset to avoid water loss due to evaporation.
- Desalination Plant RO (Reverse Osmosis) is producing 22% of the hotel water consumption and the water produced is mainly used for irrigation and re-filling the hotel swimming pools.
- Conducting trainings and meetings to educate staff on environmental issues and energy conservation.
- Using environmentally friendly and ISO 14001 certified cleaning chemicals.

With Jordan being one of the ten most water-deprived countries in the world added to an increased demand on its limited resources with the boost of development projects, we, at the Mövenpick Resort & Residences Aqaba, are committed to preserve Jordan's environment and promote sustainable tourism.

As part of our commitment, we have applied 'best' practices in all areas of sustainable hotel operations such as water and energy conservation, land use, solid waste management and community outreach by:

- Implementing a recycling programme in cooperation with Entity Green Recycling and distributing additional waste bins for the separation and collection of waste.
- Installing energy saving bulbs, dimming systems and water saving devices through out the hotel.
- Putting into operation a key card system to control electricity in the apartments by turning off the electricity supply once the guest leaves the room.

- Creating awareness of the area's parks and gardens and encouraging local products and services.
- Sponsoring and participating in Clean Up The World Campaign.

Future steps to be implemented:

- BMS (Building Management system) maintenance and upgrade.
- Installation of the Key Card Control System for the hotel's main building.

Today, Mövenpick Resort & Residences Aqaba is the first hotel in the Middle East to be acknowledged by the International FEE Green Key Eco-Label.

If you would like to find out more and how you can contribute to our aims please log on to www.Green-Key.org or www.greenkey-jordan.jreds.org . Together we can make a difference.
